Superior Legume Inoculant

GRANULATED
PEAT

EXCEED® GRANULATED PEAT FOR PEANUT/COWPEA/LESPEDEZA/MUNG BEAN/SUNN HEMP

This granular inoculant is intended to be applied in the furrow with the seed. It is a culture of highly effective strain of rhizobia (nitrogen-fixing bacteria) that will colonize the plant roots to gather and fix the “free” nitrogen of the air, making it available to the plants.

Product 2001

Use Rate 6 oz/1000 ft of row (170.1 g/304.8 m of row) or 5.0 lbs./acre (5.6 kg/ha). One bag treats 8 acres (3.2 ha).
Net Weight 40 lbs (18 kg)
Package Configuration: One - 40 lb. (18 kg) bag, 50 bags per pallet

Precautionary Information:

While Exceed® Granulated Peat for Peanut/Cowpea/Lespedeza/Mung Bean/Sunn Hemp is non-toxic, it is recommended that the applicator avoid inhalation. Visjon Biologics recommends the use of gloves and eye protection while using Exceed® Granulated Peat for Peanut/Cowpea/Lespedeza/Mung Bean/Sunn Hemp.

Directions for Use:

- Apply Exceed® Granulated Peat for Peanut/Cowpea/Lespedeza/Mung Bean/Sunn Hemp at a rate of 6 oz/1000 ft of row (170.1 g/304.8 m of row) or 5 lbs per acre (5.6 kg/ha) on 40 in (101.6 cm) rows. (See chart below.)
- Exceed® Granulated Peat for Peanut/Cowpea/Lespedeza/Mung Bean/Sunn Hemp is pelletized and should be applied through insecticide boxes or granular applicator boxes or through air seeders with a second tank. Separating the seed and the inoculant into two different application devices will ensure targeted application rates of both products are obtained.
- Apply Exceed® Granulated Peat for Peanut/Cowpea/Lespedeza/Mung Bean/Sunn Hemp Inoculant through an approved application device.
- Use recommended rate based upon row width provided in the chart below. It is preferable to do a product calibration each time the product is used. This will account for slight changes in product characteristics that may occur due to a change in density, dampness, ambient temperature, relative humidity, and general flow of the product at the time of seeding. Directly entering or selecting a calibration number could result in less accurate application rates. To achieve the highest accuracy of application rates, perform an in-field distance calibration.

User Tips

- Exceed® Granulated Peat for Peanut/Cowpea/Lespedeza/Mung Bean/Sunn Hemp Inoculant may have flowability problems under conditions of high humidity.
- Application devices should only be half-filled or three-quarters filled under conditions of high humidity.
- Do not fill boxes until the producer is ready to plant and in the field.

- Any leftover product should be cleaned out of the applicator at the end of the day, stored properly and used the next day.
- Exceed® Granulated Peat for Peanut/Cowpea/Lespedeza/Mung Bean/Sunn Hemp Inoculant can draw moisture if it sits for long periods. Avoid overfilling planting equipment.
- Where high levels of nitrogen are available in the soil or over 30 lbs. (13.6 kg) of available nitrogen have been applied to the soil, rhizobia inoculants will not perform at optimum level.

Storage of Exceed® Granulated Peat for Peanut/Cowpea/Lespedeza/Mung Bean/Sunn Hemp:

- Always read and follow instructions.
- Store in a cool, dry place out of direct sunlight.
- Store product between 40° and 77° F (4° and 25° C.)
- Open package only when ready to use.
- Use before expiration date.
- Do not store in an area which is to be fumigated.
- Small amounts of product which cannot be used according to instructions may be disposed of in a landfill.

Expiration Date:

Exceed® Granulated Peat for Peanut/Cowpea/Lespedeza/Mung Bean/Sunn Hemp carries a one-season shelf life and expires the date stamped on the bag or tote.
