

for Peanuts

Inoculant Trials 2021 & 2022

Exceed® SAR for Peanuts – More than just an Inoculant

The EPA Registered SAR Component:

- Provides **protection** against fungal infections such as **damping-off** and **white mold**
- **Interrupts** the life-cycle of the **root-knot nematode**
- **Elicits** the **plant enzymes** for vitality
- **Elevates** the innate **immunity** defense mechanism of the plant
- **Boosts germination** and builds a **stronger root system**
- **Increases yield** - trial results show an average increase of 434 pounds per acre over multiple trial locations and multiple seasons.

Exceed® SAR is guaranteed not to be harmful to costly seeds and is compatible with all seed treatments.
