

EXCEED®
Superior Legume Inoculant

PEAT

EXCEED® PEAT FOR TRUE CLOVER

This peat inoculant is intended to be applied on-seed. It is a culture of highly effective strain of rhizobia (nitrogen-fixing bacteria) that will colonize the plant roots to gather and fix the “free” nitrogen of the air, making it available to the plants.

Product 16001

Net Weight 40 lbs (18.14 kg)

Package Configuration: 1 - 40 lb (18.14 kg) packages per case, 45 cases per pallet.

CONTAINS NONPLANT FOOD INGREDIENTS

Minimum Guaranteed Analysis

Active Ingredient: <1% by Weight

Rhizobium leguminosarum biovar trifolii: 2x10⁸ CFU/g

Inactive Ingredients: >99% by Weight

KEEP OUT OF REACH OF CHILDREN

This product does not meet the regulatory definition of a hazardous chemical under 29 CFR 1910.1200. However, good industrial hygiene practices should be used in the manufacture and handling of the product.

Precautionary Information:

While Exceed® Peat for True Clover is non-toxic it is recommended that the applicator avoid inhalation. Visjon Biologics recommends the use of gloves and eye protection while using Exceed® Peat for True Clover.

Directions for Use:

- The optimum method for applying Exceed® Peat for True Clover is by using the slurry method.
- Dampen the seed with non-chlorinated, clean, cool water at a rate of 8.5 oz (251.38 mL) of water per 50 lbs (22.68 kg) of seed.
- Add appropriate amount of inoculant – 6 oz/50 lbs (170.1g/22.68 kg) of seed – and mix water, seed, and inoculant thoroughly until seed is uniformly coated.
- This method should be done in a container outside of the planter box.
- Allow 1-3 minutes for mixture to dry and then plant as soon as possible.
- Exceed® Peat for True Clover can also be applied dry directly onto the seed. Mix seed and inoculant thoroughly until seed is uniformly coated. Layering seed and inoculant will aide in this process.
- Applying the inoculant dry is also recommended for seed that is pre-treated with fungicide. However, maximum seed adhesion will not be obtained by applying this product dry.
- This product is not solely recommended for first year ground or use on ground that is conducive to low rhizobia population due to environmental stresses, and should be combined with other Visjon Biologics products if used in that situation.

Storage of Exceed® Peat for True Clover:

- Always read and follow instructions.
- Store in a cool, dry place out of direct sunlight.
- Store product between 40° and 77° F (4° and 25° C.)
- Open package only when ready to use.
- Use before expiration date.
- Do not store in an area which is to be fumigated.
- Small amounts of product which cannot be used according to instructions may be disposed of in a landfill.

Expiration Date:

Exceed® Peat for True Clover carries a one-season shelf life and expires the date stamped on the case.
